## INTRODUCTION

# PETROGOTAS

---

Petrogotas is a Brazilian company in full operation since 2010 providing services to companies in the Onshore and Offshore market. Specialized in maintenance and repairs, among other services.

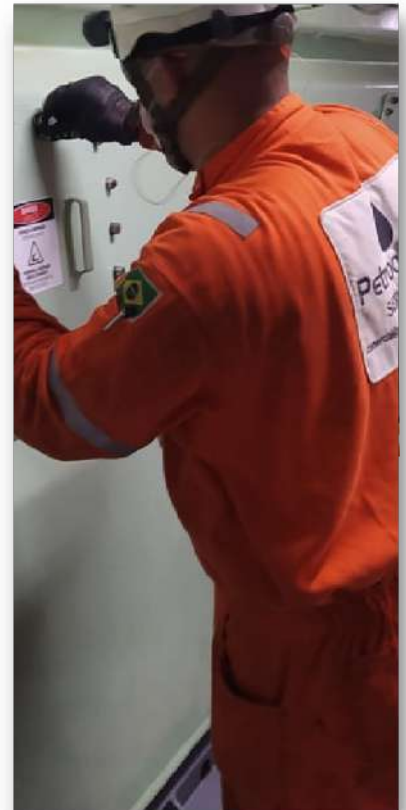

Our procedures are carried out with high-tech equipment and used by qualified and periodically trained professionals, in order to meet the most diverse types of requested services with quality and efficiency.

# INDUSTRIAL CLEANINGS

- DUCT CLEANING

Cleaning offshore pipelines, both FPSO platforms and ships, and transport pipelines is extremely important, mainly aiming at the preservation of these materials, avoiding leaks and accidents during the processes.

- CHEMICAL CLEANING

Chemical cleaning consists of a procedure that aims to eliminate contamination problems caused by biofilm, corrosion, rouge and so many contaminating substances, ensuring quality control in the industry.

## PETROGOTAS SERVIÇOS INDUSTRIAL CLEANINGS

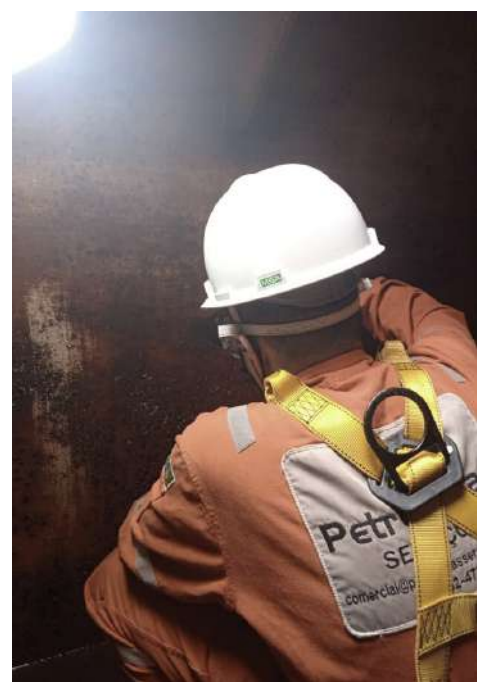

- **CLEANING AND SANITIZING OF  
RESERVOIRS AND TANKS**

Cleaning and sanitizing reservoirs is extremely important for our health, and should be carried out every six months, and whenever there is a suspicion of water contamination, either by chemical substances or by animals that can shelter inside.

Petrogotas has specialized teams to provide high quality cleaning services. Our technicians are trained and have the necessary certifications based on the technical standards of the Ministry of Labor.

Maintenance:

pumps

Heat exchangers

engines

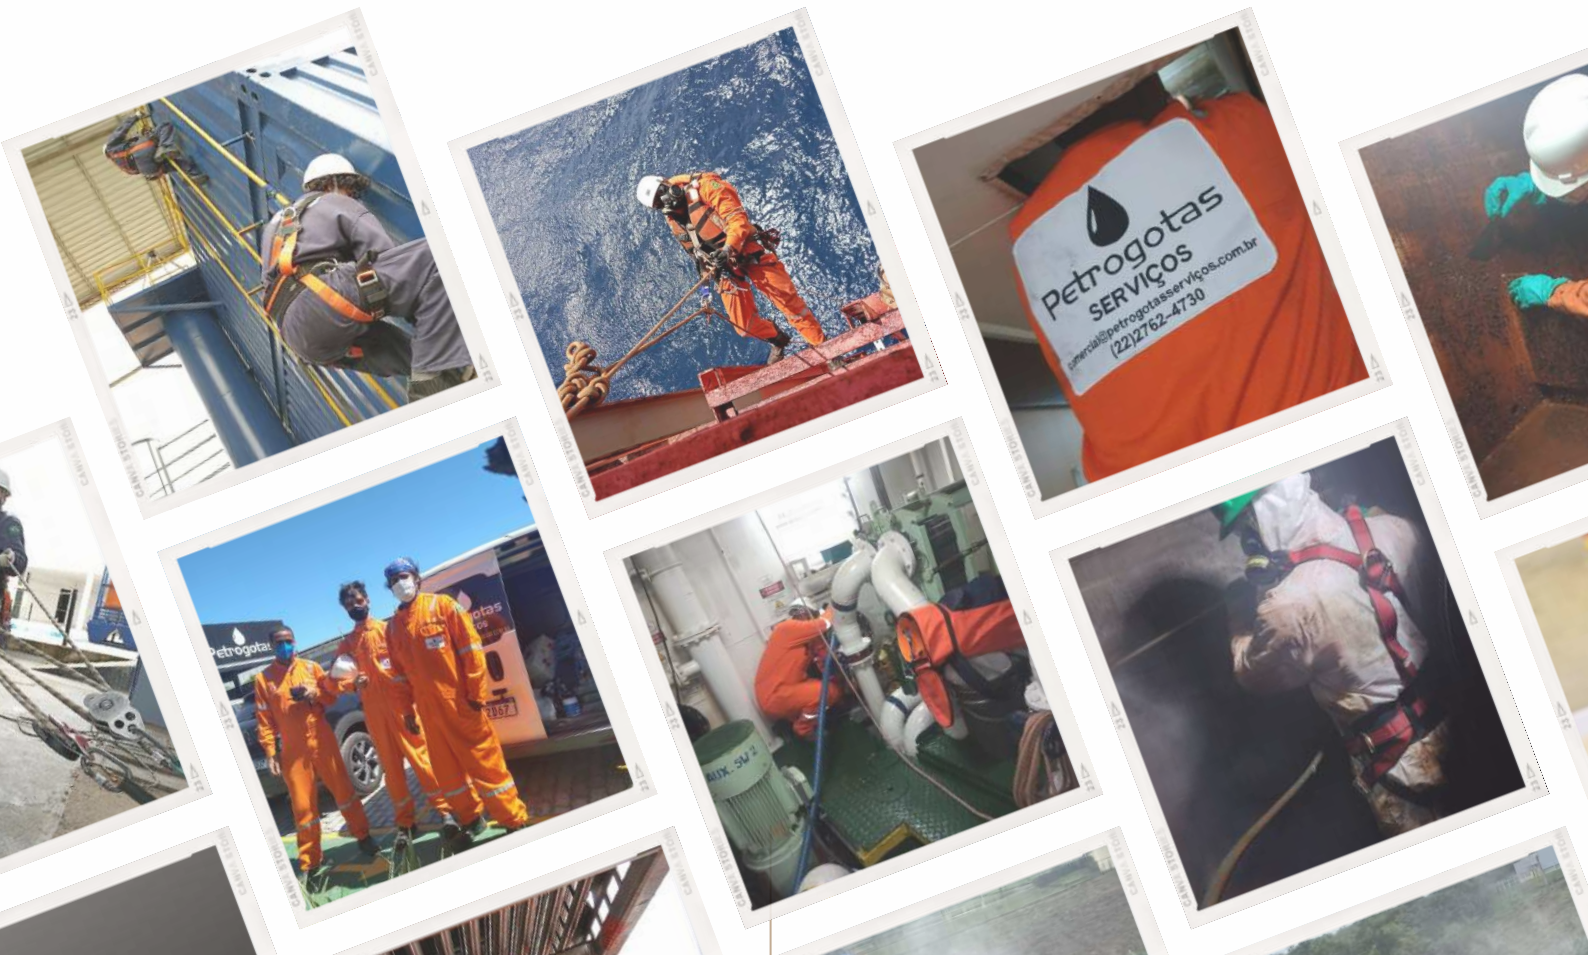

- valves

PETROGOTAS SERVIÇOS

# SUPPLY OF SPECIALIZED LABOR

- IRATA TEAM;
- HYDROJATTER;
- INDUSTRIAL PAINTER;
- OPERATIONAL ASSISTANT;
- WELDER;
- BRAZIER.

PETROGOTAS SERVIÇOS

# MANUFACTURING

- PIPING (SPOOL)
- METALLIC STRUCTURES;
- SUPPORTS;
- BODY GUARD;
- SKIDS

## PETROGOTAS SERVIÇOS

# SANITIZATION OF SURROUNDINGS

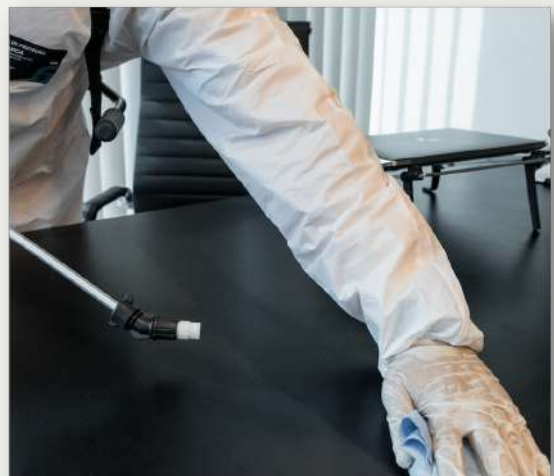

It is a work that fights pathogenic agents such as viruses, bacteria, mites and fungi. Common cleaning products such as brooms and detergents are not effective in eliminating these invisible threats, so special equipment is needed.

The products used for Petrogotas Sanitization are registered as actives on the ANVISA website for the control of microorganisms, fungi and viruses. Reports from the US Environmental Protection Agency show that control of the virus takes place within 10 minutes of contact.

### CONTROL OF URBAN PEST AND VECTORS

Our range of services also has this extremely important for the quality of the environment.

- Disinsection;
- Cockroach control: *Periplaneta americana*, *Blattella germanica*;
- Rodent control: *Mus musculus* (mouse), *Rattus rattus* (black or roof rat), *Rattus norvegicus* (rat);
- Ant control;
- Determining: subterranean termite, arboreal termite and dry wood termite;
- Flying insects: flies, mosquitoes, wasps, etc.;
- Arachnids: spiders and ticks.
